## VERTICAL CAN DECANTING BALER

### ENGINEERING SOLUTIONS FOR THE WASTE & RECYCLING INDUSTRIES

The Gradeall Vertical Can Baler GVC 750 is dual purpose machine that will both bale beverage cans and also drain out any liquid that may be inside them.

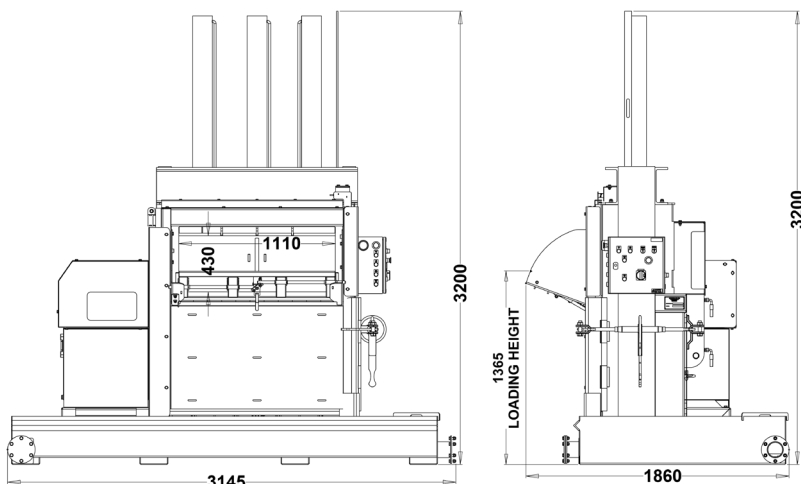

The GVC 750 offers huge time savings, this is because it eliminates the need to manually empty full beverage cans. The cans do not even need to be opened up, even if carbonated! This machine has ample force to crush and drain all beverage cans. Making it ideal for factories producing large volumes of beverage can waste.

Liquid control is managed by built in splash guards which reduce the mess caused by the crushing of thousands of carbonated drinks cans. The integrated sump below the baler is able to deal with the resultant fizzing liquid that comes out. Ports and filter screens are provided to link up with existing liquid drainage systems.

- No pre processing required, simply deposit full drinks cans into machine and it will crush and drain them with ease.
- Easy to operate control panel
- Integrated sump with filters and ports to connect up to existing liquid drainage systems.
- Fast return on investment due to value of scrap aluminium bales
- Heavy duty materials and construction ensures long service life.

Model	GVC 750
Width (mm)	3145
Height (mm)	3200
Depth (mm)	1860
Power supply	415V 3 Phase
Motor size (Kw)	7.5
Cycle time (Seconds)	55
Bale dimensions (mm)	1200 x 600 x 500
Bale weight - 8000 Aluminium Cans (Kg)	120
Machine weight (Kg)	2700
Head compaction force (Tonne)	75
Bale chamber size	1180 x 1235 x 500
Noise level (dB)	65-70
Loading door height (mm)	1365
Loading door opening (mm)	430 x 1110
