

AGRICULTURAL TYRE CUTTER

ENGINEERING SOLUTIONS FOR THE WASTE & RECYCLING INDUSTRIES

FEATURES

The Gradeall Agricultural Tyre Cutter has been specifically designed to shear large agricultural Tyres, end of life tyres found on Tractors and other agricultural Machinery. These tyres cause a significant problem at the processing stage, due to their large size. Unfortunately Tyres of this size do not fit into ordinary Tyre Balers and as such they are cut up into smaller pieces first. After this point the segmented tyres are easier to transport or Bale.

The Gradeall Agricultural Tyre Cutter is an extremely well engineered and durable piece of recycling equipment which can effortlessly slice through large Tyres. It has been designed to be as easy to use as possible with integrated lifting facility; simply roll the tyre up to the cutter and it will lift and cut the tyre, reducing the manual labour requirement.

Safety is of paramount importance, operators are kept safe with integrated safety guards, two handed operation and dual emergency stops.

Available in both stationary and portable variants.
