

GGC GLASS CRUSHER

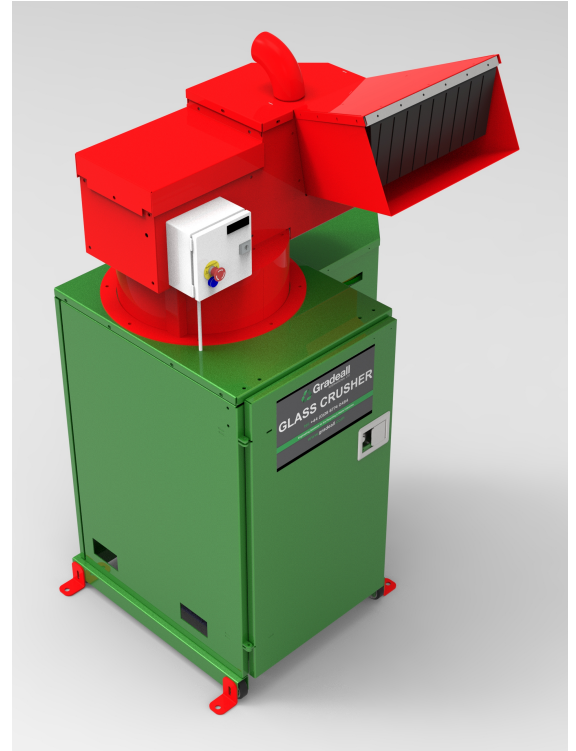

ENGINEERING SOLUTIONS FOR THE WASTE & RECYCLING INDUSTRIES

This glass crusher is a cost effective unit with a capacity to crush up to 650 bottles in less than 10 minutes.

The crushed glass is collected in a 140Lt bin, wheeled inside the machine.

The unit has a built in extraction system which filters any dust created during the crushing process.

The design and construction is made for small applications to give long and reliable service. The crusher is simple to operate and constructed with only a few moving parts and therefore the maintenance is low.

- Reduce volume with 80%.

- Equipped with filter

- Easy installation.

- Small Footprint

- Simple to Operate

- Power Supply 240v 13A Single Phase
