To whom it may concern,

I wanted to write to Gradeall to compliment you on the wireless technology fitted within my MKII Tyre Baler. This has been extremely helpful as Gradeall can access the baler remotely to make any service checks and adjustments. This saves on downtime as I do not have to wait on an engineer arriving. This MKII model also counts the number of bales produced and then sends the data my email address. This helps when it comes to keeping an eye on my staff and organising the movement of the bales and the timing for the freight.

I would have no problem in recommending the Gradeall MKII Tyre Baler.

Yours faithfully

Rik Carlin
Director
